Our Services

Strategic Tecnology Solutions

BarTech Solutions helps organizations, companies design, deploy, manage and service barcode, RFID, data collection, wireless and mobility technologies that improve productivity, meet new compliance demands, and reduce operating costs

Our Solutions

1 **Manufacturing Solutions**

Barcode, RFID and Tracking Technology in Manufacturing Extensive industrial experience and solution offerings can assist you in the choosing of the right application and the complementary hardware technology

2 **Warehouse Management Solutions**

An effective Warehouse Management Solution (WMS) allows to determine what information want to capture from one end of the process to the other and how to use that data to manage the operation with right combination of software, hardware, and support services will give you confidence that you are in control of your inventory from receiving to shipping.

Our Solutions

3 **Inventory Control and Asset Tracking Solutions**
A software is based on barcode technology. Affixed to each item is a label or tag on which a barcode captures all the data you need to manage your inventory, including SKU, lot and serial numbers and expiry date. You decide what you need both for day-to-day inventory tracking and for reports on productivity and performance.

4 **Traceability System Solutions**
The ability to track the history of an object, from the point of manufacture to the point of use. A traceability system allows producers, distributors, and consumers to know the source and chain of custody of products, ingredients, and materials.
