# FIXED ASSET TRACKING SOFTWARE

V 2.0

# WHAT IS FIXED ASSET TRACKING SOFTWARE ?

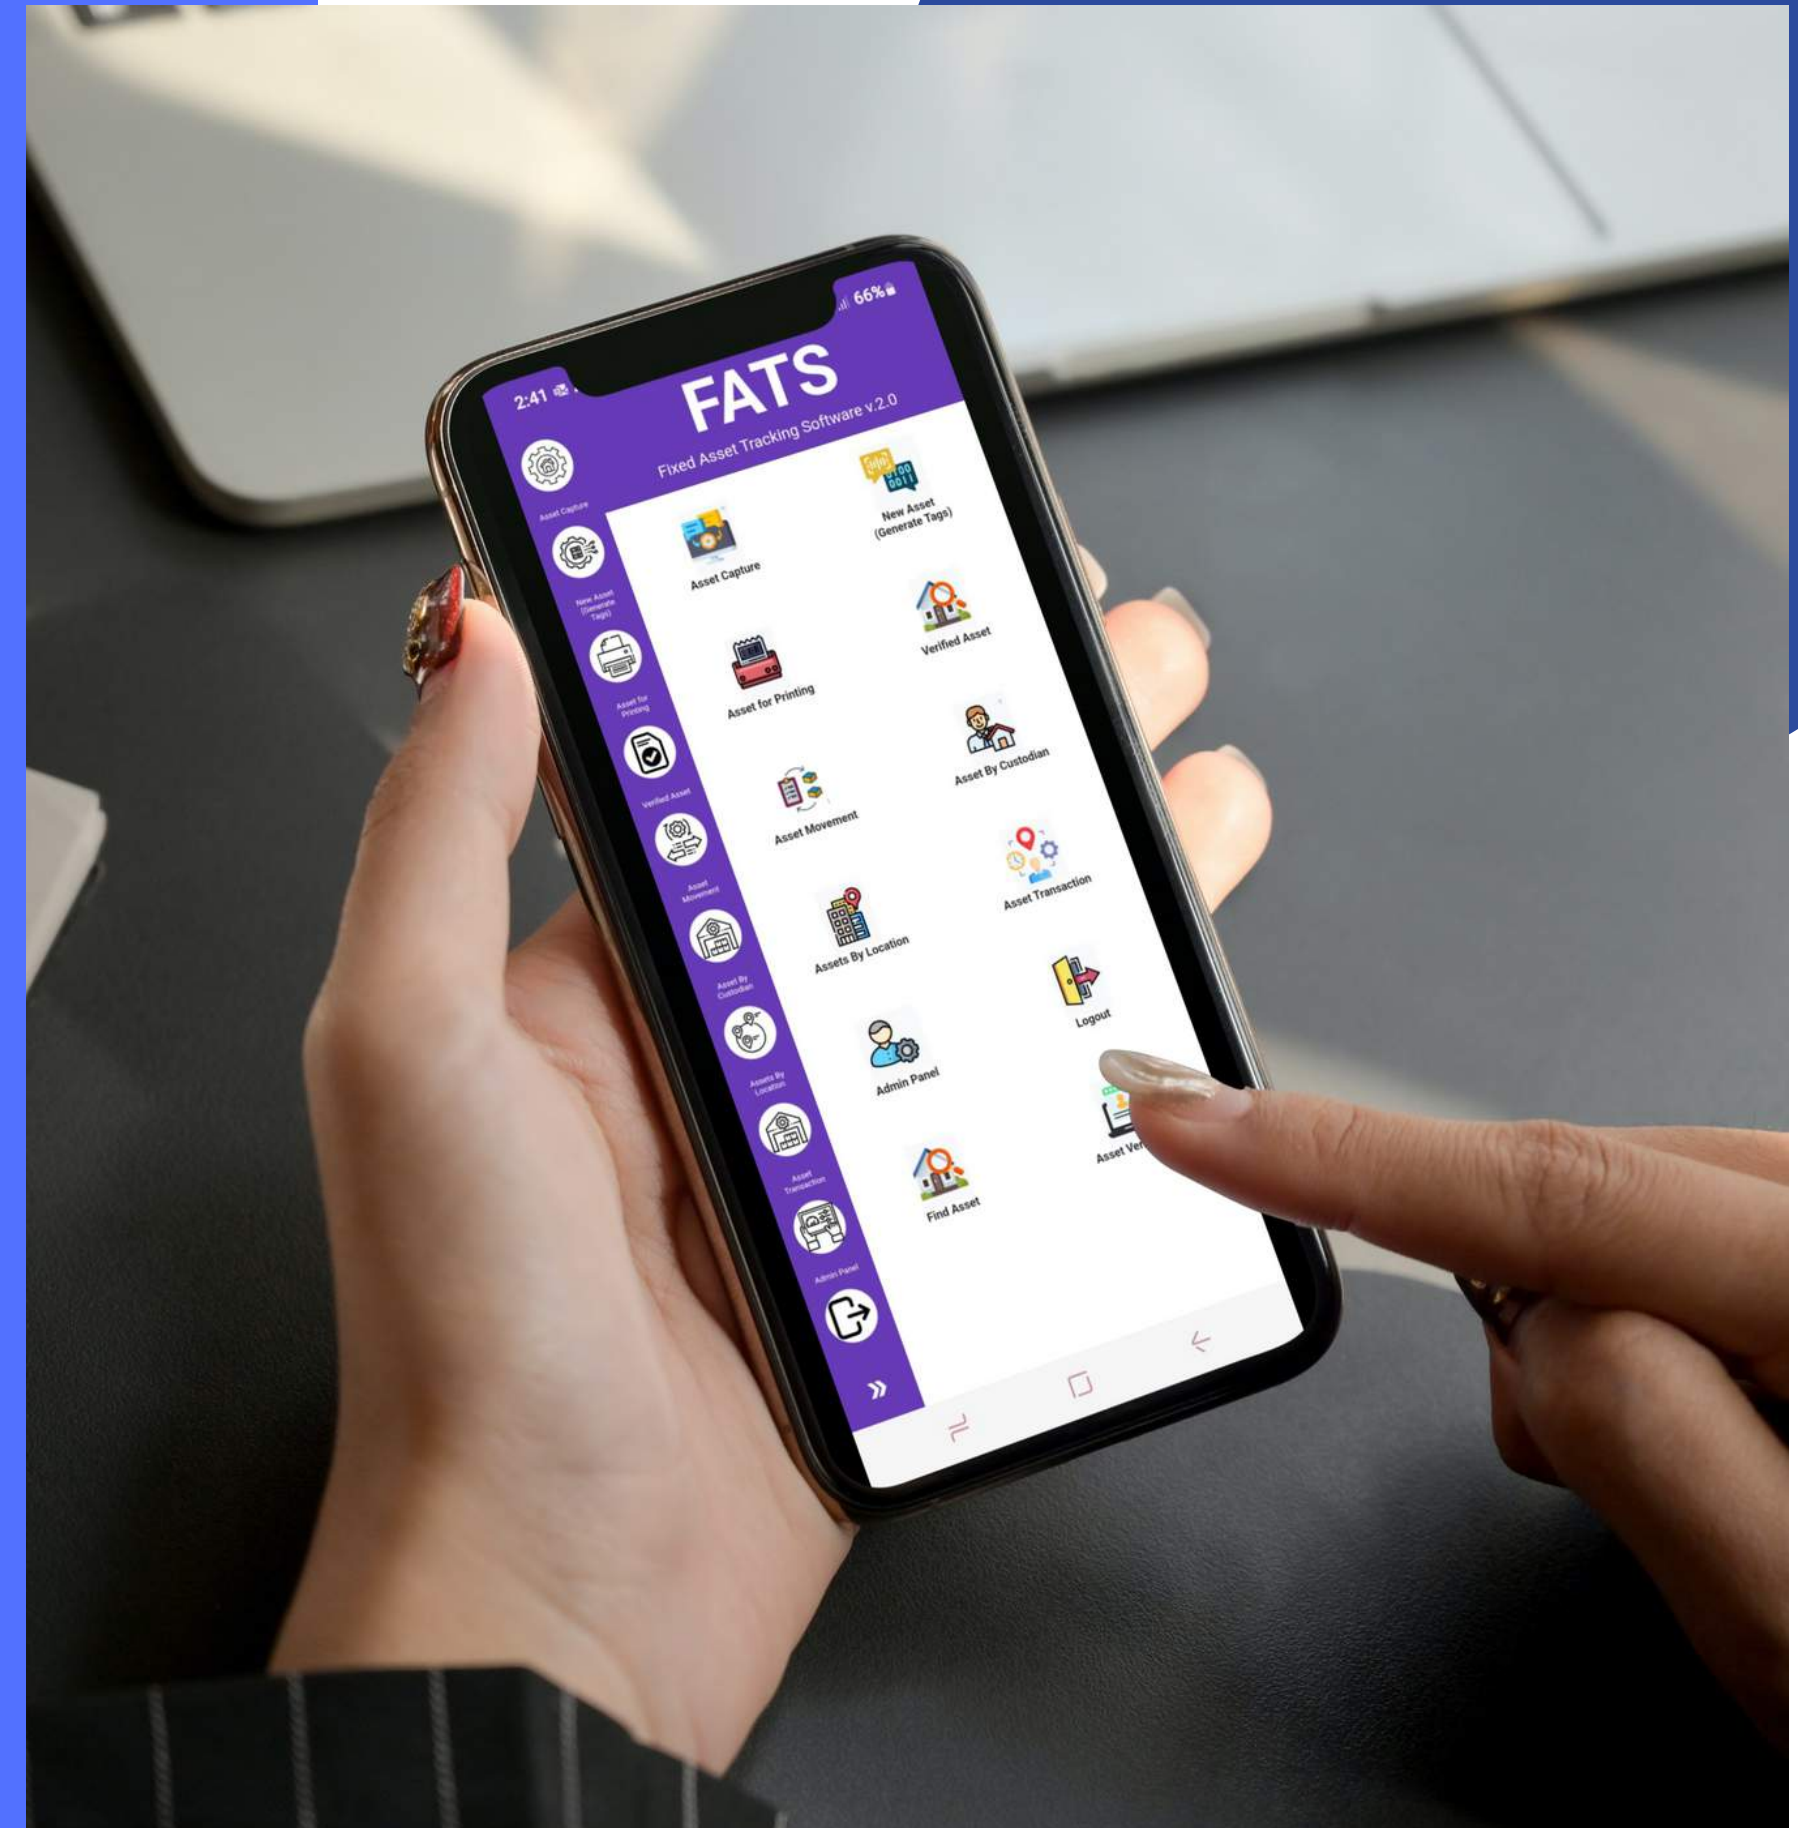

its a system solutions that creates unique identification codes, such as barcodes or RFID (Radio Frequency Identification) tags, to track and manage physical assets within an organization.

its a software system solution that can be used and accessible on the web app and mobile application.

# WHAT IS FIXED ASSET TRACKING SOFTWARE ?

And a process of labelling assets with unique identifiers to help track their location, status, and other important information

# Features & benefits

1

## ● ASSET TRACK AND TRACING

system solution will allow you for accurate and efficient track and tracing of all assets (in and out), minimizing the risk of loss or theft. Ensuring to monitor movement of the assets

2

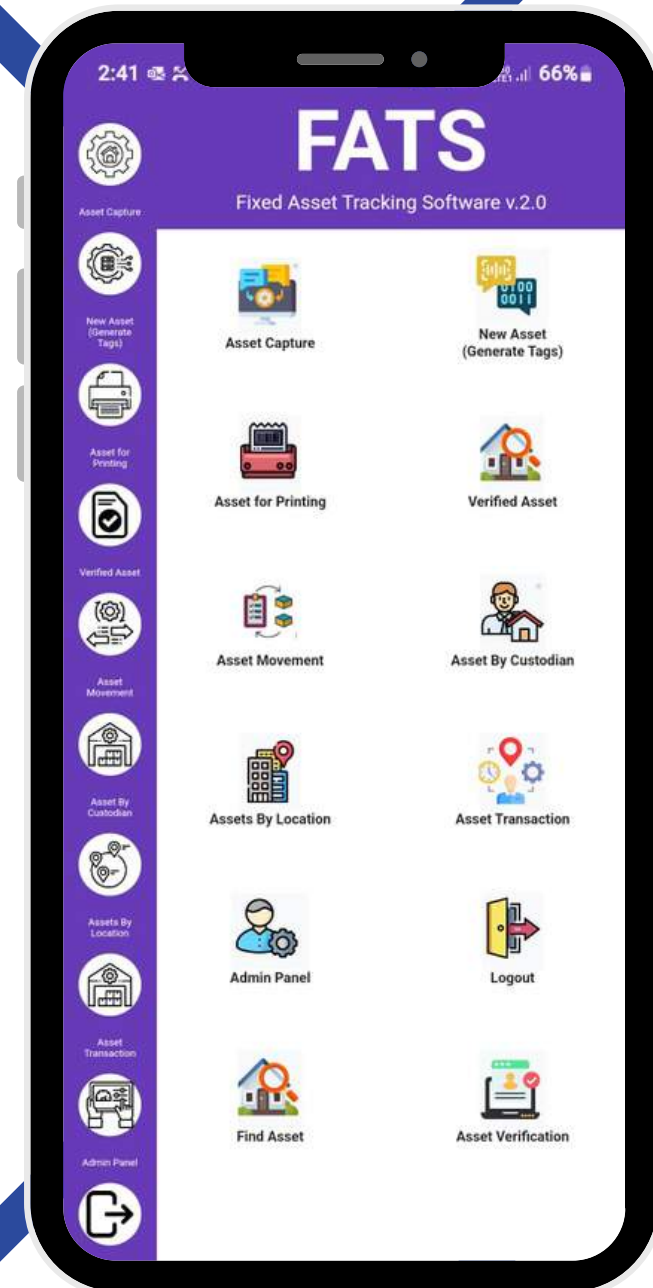

## ● ASSET MANAGEMENT ENHANCEMENT

provides detailed information, including its condition, maintenance history, and other important data. This information can help improve or enhance the asset management processes, including maintenance scheduling, repair, and replacement planning.

3

## ● DATA ACCURACY/ENHANCED OPERATIONAL EFFICIENCY

Providing accurate and up-to-date information about all assets, including location, condition, and value that helps increase operational efficiency by providing real-time visibility into asset status, reducing downtime, improving inventory management.

# Features & benefits

4

## ● **COST SAVINGS**

By improving asset management processes, asset tagging can help reduce maintenance and repair costs, as well as extend the life of assets. This can help prevent duplicate asset purchases or unnecessary asset rentals

5

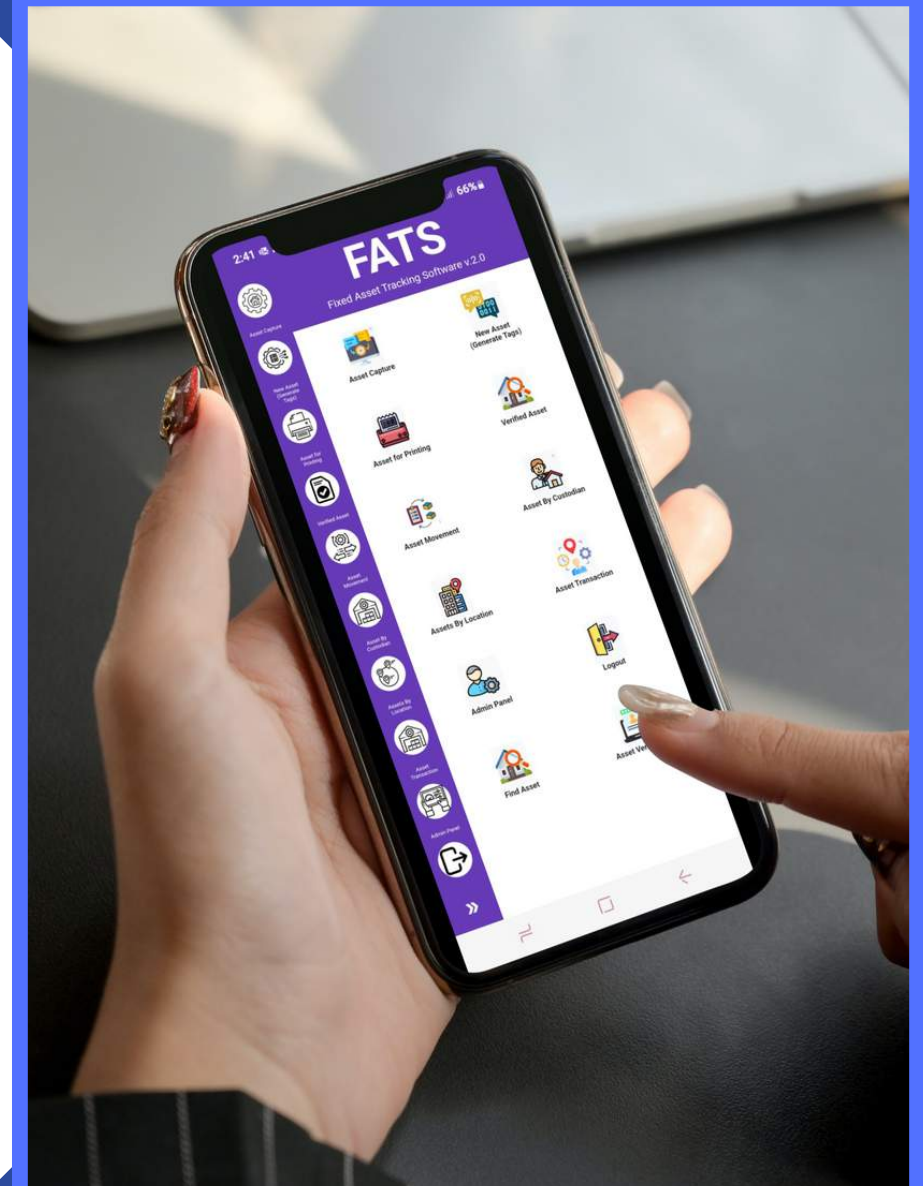

## ● **IMPROVED DECISION MAKING**

Providing valuable data that can be used for strategic decision-making, such as identifying which assets are most critical to business operations, forecasting future asset needs, and optimizing asset utilization

6

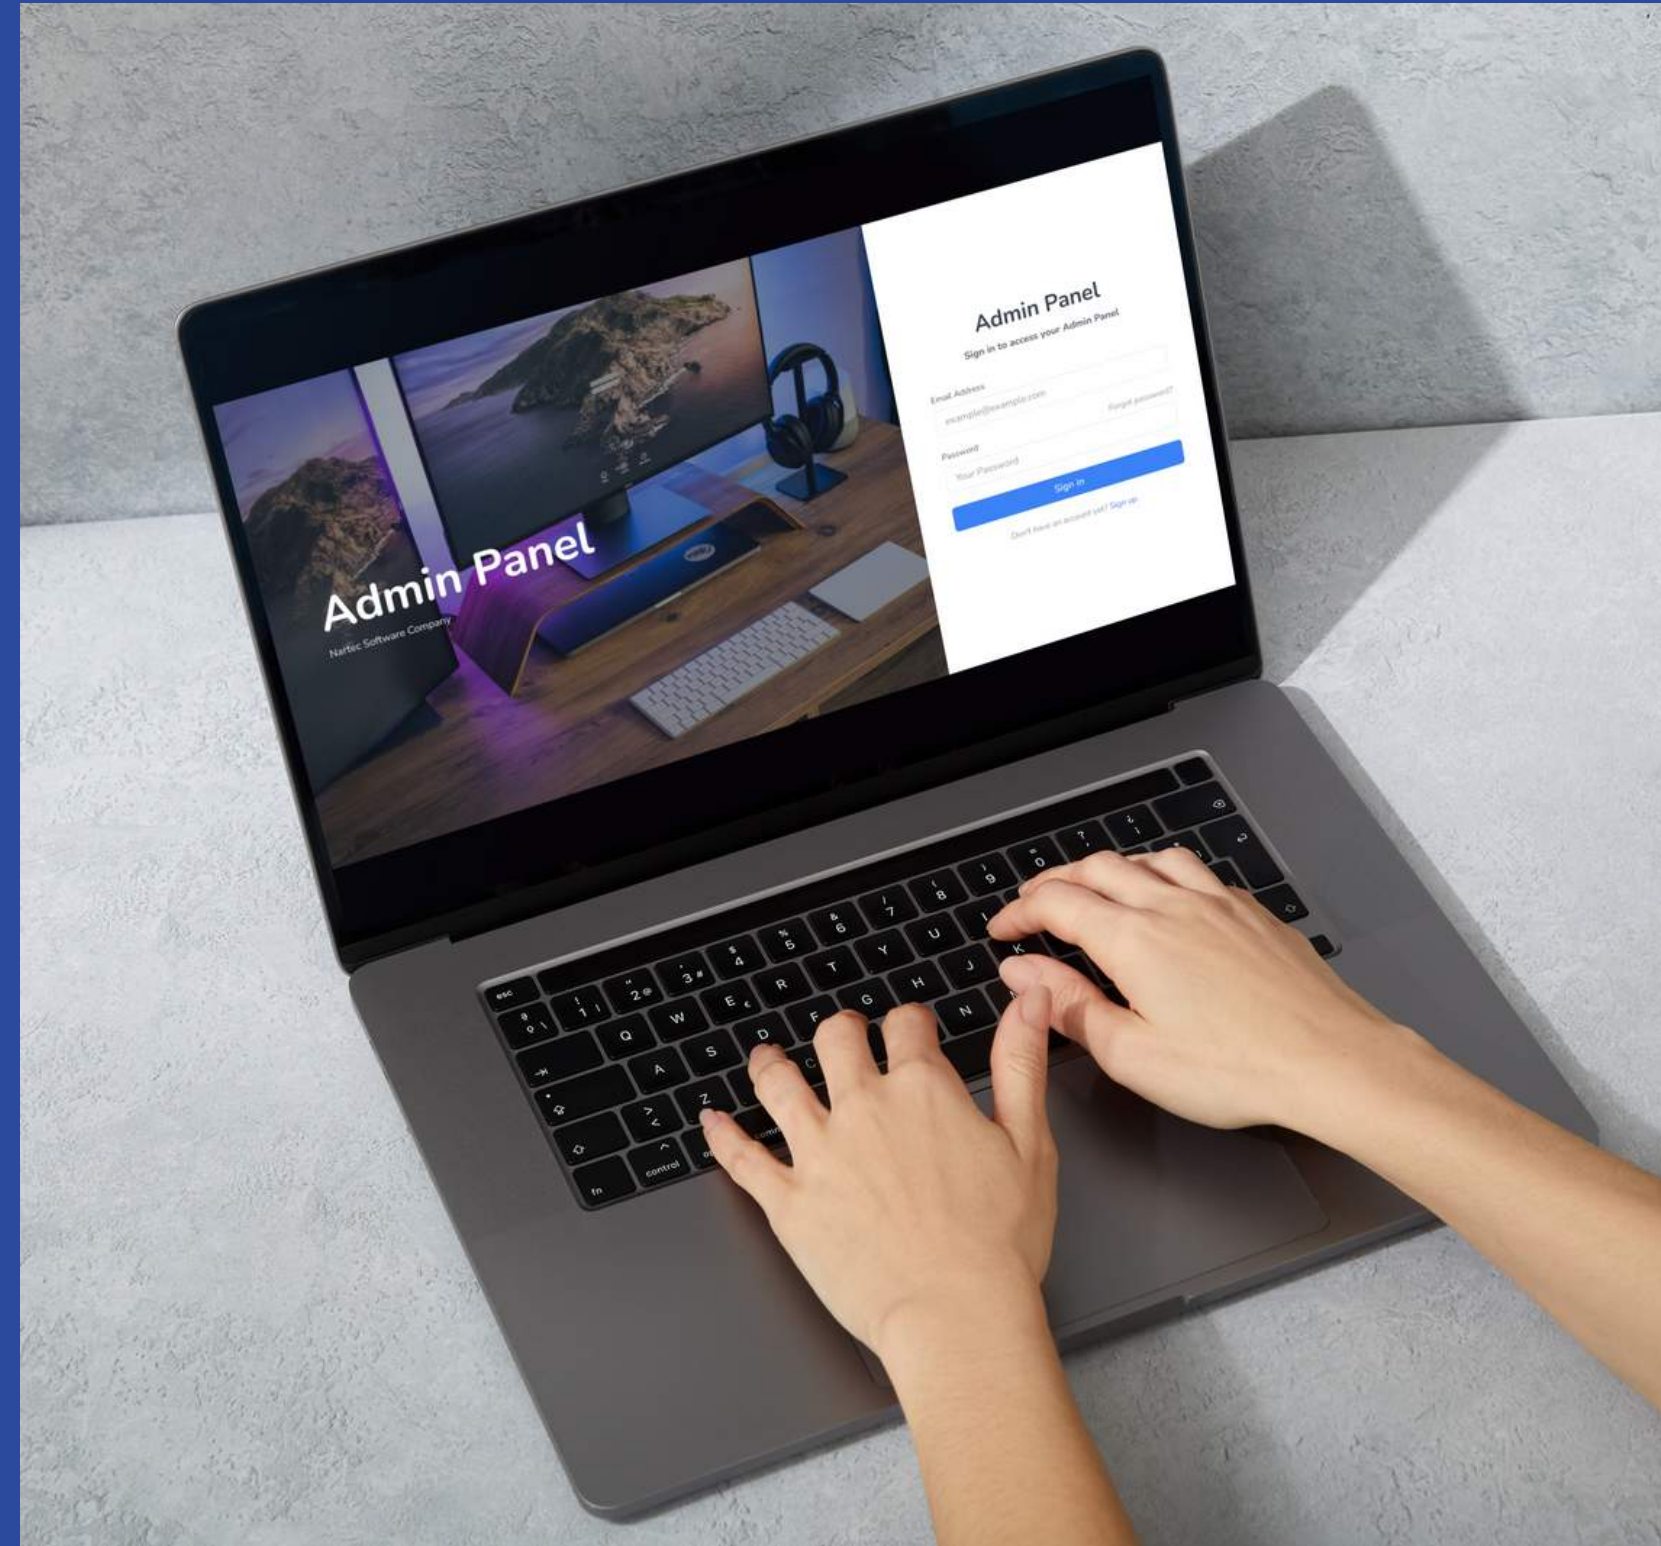

## ● **IMPROVING COMPLIANCE**

Ensuring compliance with industry regulations and standards, such as those for environmental, health, and safety.

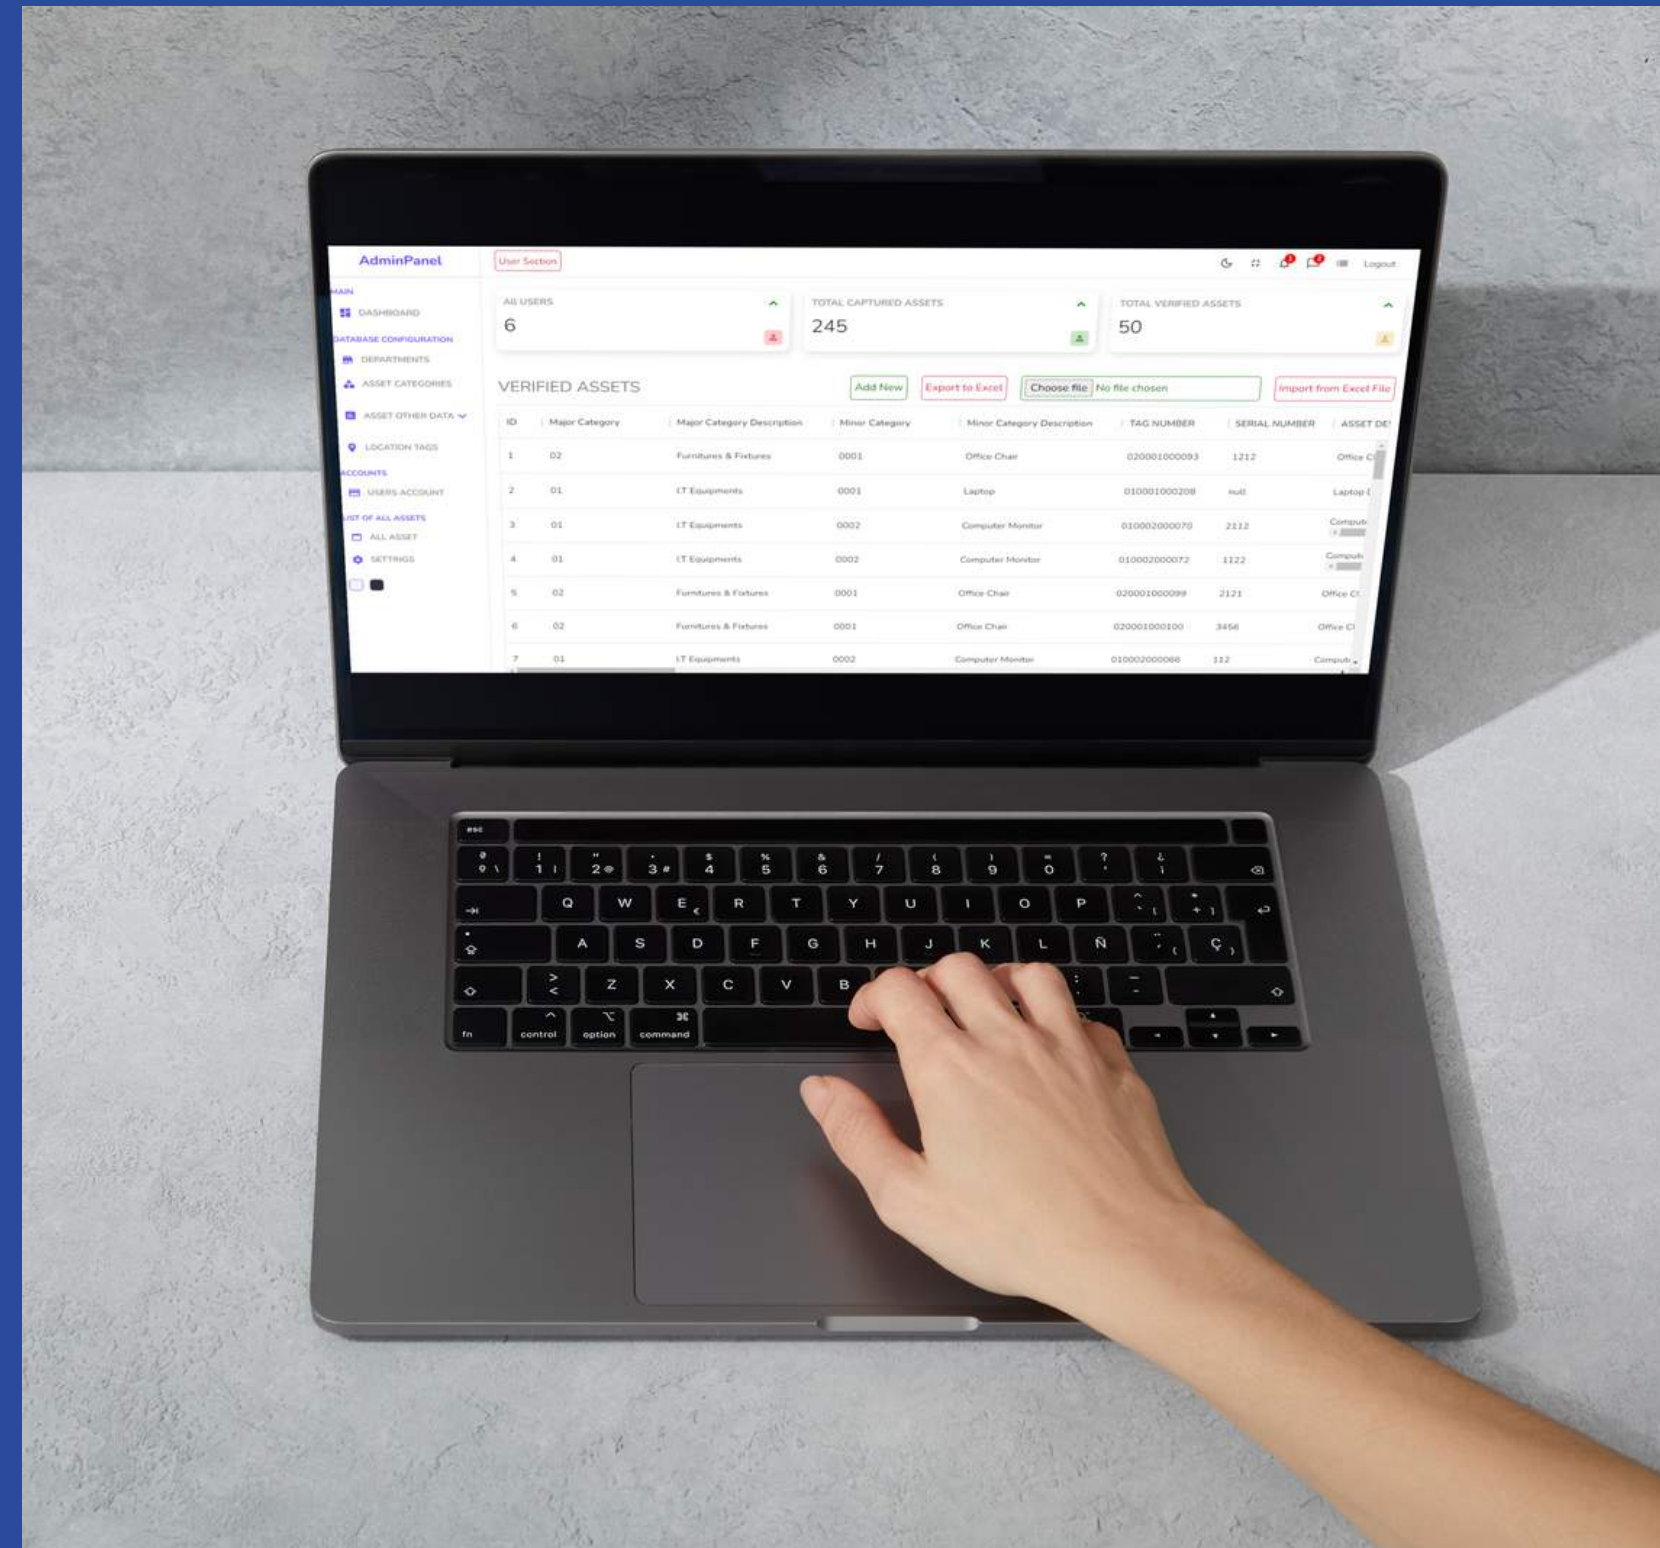

# HOW DOES IT WORK?

**LOGIN TO YOUR  
ADMIN PANEL**

# SETTINGS AND DEFINING ASSETS IN THE ADMIN PORTAL
